offered by a plurality of providers;

receiving a request identifying a customer and including a bundle code;

converting a portion of the received request into a set of provisioning requests based on the received bundle code; and

providing the provisioning requests to the plurality of providers.

22. (Twice Amended) A billing controller for processing requests for products comprising:

a database configured to store a set of bundle codes, each bundle code indicating a set of products offered by a plurality of providers;

a receiver configured to receive a request identifying a customer and including a bundle code;

a converter configured to convert a portion of the received request into a set of provisioning requests based on the received bundle code; and

a component configured to provide the provisioning requests to the plurality of providers.

23. (Amended) The billing controller of claim 22, wherein the converter includes:

a decoder configured to dec[c]ode the bundle code to identify the plurality of providers for the selected products.

37. (Twice Amended) A computer program product comprising:

a database configured to store a set of bundle codes, each bundle code indicating a set of
